Add Your Custom Design to Palit Graphics Cards- SOP

Adding your custom design with PALIT Maker is simple. Make sure the cover is properly aligned with the card, then press it down firmly until it's securely attached.

Notes

- Palit provides two versions of 3D files.
  - ✓ **Creator Version**: For 3D editing masters. The file offers a plain cover without any pre-design on it. Users can take it as basement to design their own cover.
  - ✓ **Painting Version**: For general users. The file comes with pre-designed patterns. Users can simply paint the cover that fits their own style.

- Selected versions contain two file types. Choose the proper file depending on the dimensions your 3D printer can make.
  - ✓ **Standard File**: The length is over 300mm.
  - ✓ **Two Pieces File**: The length is under 200mm.
  - ✓ There's no limitation for 3D printer whether FDM, SLA or others.

Warranty

As long as creators didn't disassemble any part of the thermal or backplate, it won't break warranty.

Users need to remove the customized design and revert it back to the original condition of the graphics card if apply for RMA.
